WHAT IS A COOKIE

A Cookie is a small text file that stores Internet settings. Almost every website uses Cookie Technology. The Cookie is downloaded by your Internet browser the first time you visit a website. The next time you visit the website with the same terminal device, the Cookie and the information in it, is, either sent back to the originating website or to another website to which it belongs. Cookies do not harm your computer or device. By that, the website can detect that it has already been opened using this browser, and in some cases it will then vary the content it shows. Some Cookies are extremely useful because they can improve your user experience when you return to a website you have already visited. This assumes that you are using the same terminal device and the same browser as before. If so, Cookies will remember your preferences, will know how you use the website, and will adapt the content you are shown so that it is more relevant to your personal interest and needs. In essence Hashtag Viral uses Cookies in order to improve the user experience by enabling our website to remember you either for the duration of your visit or for repeated visit. Cookies are either set by our website or they may be set by other websites that run content on our website. (Third –Party Cookies).

You can always manage your Cookies by changing your settings within the web browser you are using to visit our site.
